

TASK DAY 8

Create a DB (Normalization_DB) and then create the tables “you think” to consider the Normalization Forms.

You have this Students Table

ST_ID	ST_NAME	PROF_ID	PROF_NAME	GRADE
4562	Ahmad	1	Ross	99
4563	Yara	2	Pop	89
4564	Ali	3	Borner	80
4565	Sara	4	Jack	95
4566	Omar	5	Anna	82

Q2: create a Case for getting the Adults if the age is above 17 and Teenage if less.

Q3: define stored procedures

Just focus on how you can organize your data or your tables,

Good Luck our Future Developers 😊

Note: Send me the Script and the Word document with the snipping's
